B

The Orlando Health PD Planning area extends from Gore Street to Kaley Street; Orange Avenue to Interstate 4. The planning area is in recognition of the fact that properties within this larger area of the City affect the Orlando Health operation, and that Orlando Health may add or remove property within the area as the needs of the core campus evolve. The planning area is therefore designated and used within the text of the PD for specific planning instruments and in acknowledgement of the benefit of coordinated planning concepts.

This graphic indicates properties which are governed by the PD. The graphic also identifies properties that fall within the approved 'ORMC Superblock' area. The superblock concept acknowledges the complexity of uses around the ORMC/MD Anderson/Winnie Palmer Hospital complex and the corresponding need for specialization of access, design requirements and other provisions to serve the ongoing operation and enhancement of facilities within this area.
