	– Sign Palette	
	– Table of Sign Standards	
	– Detailed Sign Specifications	
54	Sign Locations	
64	Documentation of Other Approved Signs	

## Introduction

Orlando Health is an existing Planned Development within the City of Orlando. As a major center for hospital and medical related uses for the region, Orlando Health seeks to provide a consistent, logical, and effective wayfinding system for the thousands of patients and employees who travel to and from the downtown campus every day. The following document represents the Master Sign Plan for the Orlando Health PD. The original Sign Plan was adopted as an exhibit to the Amended and Restated PD of 1998 and further amended in 2004. The record of the 2004 Plan was lost, necessitating a replacement version, approved by Planning Official Determination in 2007. Several minor amendments have been made since the replacement plan was approved to add specific new signage.

In 2011, Orlando Health underwent an institute-wide rebranding, including a new corporate name, logo, color scheme, etc. Along with this rebranding came renewed interest in the downtown campus' signage system. By March 2012, a comprehensive new wayfinding plan was produced to completely overhaul campus signage. Major changes from the previously adopted sign plan include:

- A revamped sign palette, with new designs for all campus signs, consistent with the updated brand;
- New on-site sign locations;
- The addition of off-site signage through an Encroachment Agreement with the City.

Though the new plan was developed essentially from scratch, some sign locations are consistent between the previously adopted plan and this plan.

## Coordination with City of Orlando

As an exhibit to the Orlando Health PD, this Sign Plan describes approvals for both on-site signs (signs on Orlando Health PD property) and off-site signs (signs in the ROW or on property not owned by Orlando Health) within and adjacent to the Orlando Health downtown Campus. The Hospital has had extensive coordination with and cooperation from the City of Orlando regarding the development of campus wayfinding. This continued working relationship will help facilitate a logical, cohesive, and coordinated vehicular and pedestrian environment as Orlando Health continues to expand its medical facilities and services for Central Florida.

## Amendment Process

From time to time, as conditions on the campus change, it will be necessary to amend the approved Sign Plan. Amendments to the Sign Plan are accomplished through Planning Official Determination (POD). Changes requiring a POD include:

- Increasing the number of approved signs;
- Significant relocation of an existing sign;
- Adding to or changing the approved sign palette;

*Note: Adding or moving signs within the ROW must also be reviewed according to the conditions of the Encroachment Agreement.*

Changes not requiring a POD include:

- Replacing message text;
- Maintenance;
- Reasonable adjustments to the location of an existing sign within the same property;

## General Conditions

The following general conditions shall apply to signs within the Orlando Health Downtown Campus:

- Flexibility of Location (on-site signs) – all on-site sign locations shown on the maps included with this document are approximate and do not describe exact locations. Actual sign positions will be subject to conditions on the ground, as presented in the permitting process.
- Offsite Sign Locations – all off-site signs located within City ROW must be approved as part of an Encroachment Agreement with the City and are subject to permitting. Approval for the signs includes a joint site assessment between City Staff and the Hospital to determine appropriate locations. Signs on properties not owned by Orlando Health are subject to signage easements with the appropriate property owners.
- Lighting – unless specifically stated, all signs may be internally or externally lit, in accordance with City Code and as detailed in the permitting process. Where appropriate, signs may be designed to utilize solar power, with PV panels and battery storage incorporated into the design of the sign.
- Maintenance – routine maintenance carried out on signs and the updating of message text shall not require a permit or an amendment to this Sign Plan.
- Street Signs – the upgrading of street signs is permitted within MUTCD standards and with the coordination of the City's Transportation Department.
- High Rise Signs – high rise signs are governed by the Orlando Health PD Ordinance and Section 64.246 of the City of Orlando Code of Ordinances.

- Building Address Identifiers – Each building on campus is allowed one (1) wall or canopy-mounted Building Address Identifier not to exceed 9" in height.

- Internal Signs – Signs that are internal to buildings, parking garages, parking lots, plazas, and pedestrian walkways that do not otherwise address the public ROW shall not be governed by this PD Sign Plan.

## Sign Types

The following pages outline the design and dimensions of the range of sign types approved within this Sign Plan.

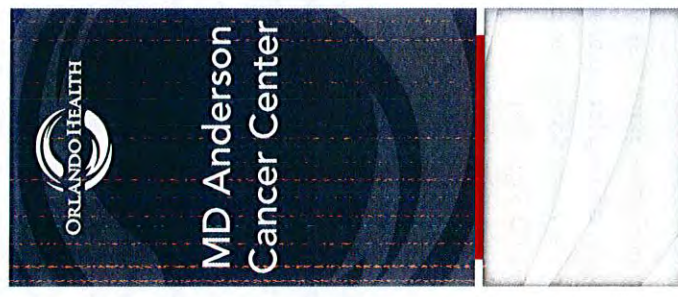

- The Sign Palette illustrates the standard sign types that are used throughout the OH Campus area.
- The Table of Sign Standards provides for the maximum dimensions and number signs for each sign type.
- The sign specification sheets show the details and typical dimensions of standard sign types.

A – Major Vehicular Gateway

B – Minor Vehicular Gateway

C – Hospital ID

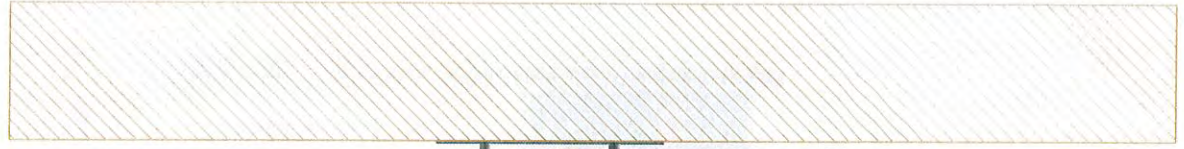

D – Building ID

## **Documentation of Other Approved Signs**

The following photos document previously approved signs that do not conform to the adopted sign plan palette. Each of these signs is unique due to their location, construction, or use of individual logos or building names.

### ***High Rise Signs***

High rise signs are governed by the OH PD and the Section 64.246 of the City of Orlando code. They are labeled HRI on the High Rise Sign Map.

### ***Wall-Mounted Signs***

Unique wall-mounted signs are labeled as WBI signs on the Other Campus Signs Map. These signs are used at key campus buildings such as ORMC and MD Anderson where specialized signage and identification is warranted and where ground-mounted ID signs are not feasible.

### ***Other Identification Signs***

Unique ground-mounted signs are labeled OI on the Other Campus Sign map. Efforts have been made to reduce existing OI signs and prevent the proliferation of such individual ground signs. Thus far, these have been reduced to a total of three signs.
