12. **JUSTIFICATION:** Document justification for request. Include anticipated economies or efficiencies to be realized by the City, including reductions in personnel or actual cost (cash flow) reductions to be realized in your budget. The Transportation Engineering Division is replacing old copper wire (twisted-pair) communications lines with modern fiber optic cable. This reduces the system failures due to deteriorating wiring and communications interruptions due to lighting-induced current surges. Also, the fiber optic cable allows TRE to upgrade traffic communications system from antiquated serial modems to modern Ethernet packet-switched communications. This, in turn, allows the City to communicate more efficiently and to accommodate future technologies that will improve safety, increase efficiency, and make Orlando a better place to live, work, learn, and play.
