

Iron Bridge Easterly Wetlands Wastewater Treatment

Facts

- Orlando Wetlands Park represents the first large scale man-made wetland designed to treat reclaimed water and provide wildlife habitat.
- The wetlands began receiving flow from the Iron Bridge Water Treatment Facility in July 1987.
- Nineteen miles of berms were built to create 18 wetland cells, and 54 water control structures were incorporated into the system. A 75-acre lake was created to provide fill for the berm construction.
- Today the wetland system provides habitat for numerous animal species, including over 200 bird species, otters, foxes, deer, turtles, snakes and alligators.
- Over 2 million aquatic plants and 200,000 trees were planted to create the wetlands.

Awards

Reminders

Please sign in when you arrive and sign out when you leave to help us monitor park usage.

-  Leave pets at home. **Pets are not allowed on the property. (Horses are permitted)**
-  Leave your car in the parking area and enjoy a peaceful walk. **Motorized vehicles are prohibited.**
-  Bicycles are restricted to the unpaved, elevated berm roads that crisscross the artificial wetlands, and must yield the right of way to pedestrians.
-  **To protect native plants and animals, bicycles are not allowed on the hiking trails, road shoulders or in the woods.**
-  Fishing, swimming and boating are prohibited.
-  Camping and cooking fires are not allowed on the property.
-  **Be prepared for primitive hiking by bringing water, sun protection, comfortable shoes and insect repellent.**
-  A cooler of cold drinks and snacks will be a welcome treat after your long walk. Please help us keep the park clean by removing all trash which you produce during your visit.
-  Be considerate of others. Loud noises frighten away wildlife. **Leave radios at home.**
-  Keep wildlife on the wild side. **Don't harass or feed the animals.**
-  Leave wildflowers and plants for others to enjoy. **No collecting of living plants or animals is allowed.**
