

**MEMORANDUM**

**To:** David Billingsley, Chief Procurement Officer

**From:**  Christopher Cairns, Transportation Engineering Division Manager

**Date:** May 18, 2017

**Subject:** Letter of Intent – Motorola Solutions

---

Transportation Engineering is requesting to purchase 41 APX4000 portable radios and three (3) APX1500 radios. This purchase would replace existing radios currently in service. The radios currently in place are past their maximum life expectancy and are no longer supported by Motorola. These radios are critical for communication for the numerous operations within the Transportation Engineering Division, including but not limited to Traffic Management Center, Signal Maintenance, and Event Management Center.

We would like to move forward with this purchase through Motorola Solutions, Inc who has a current contract with Broward County Sheriff's Office. We consulted with OPD Radio section, who recommended this model radio and suggested this contract as a means.

Thank you for your consideration.
