PROGRAM MANAGEMENT DETAILS

OPA90 Facility Program (USCG)– Project lead for Oil Pollution Act compliant facilities; maintained facility ops plans and amendments, scheduled and conducted annual inspections, conducted spot checks to ensure compliance, and filed enforcement action when appropriate.

Instructor Environmental Regulation, EVR4033 – Developed course work for a class of between 40-60 upper level undergraduate students. This included creating grading rubrics for all assignments and exams, scheduled guest speakers from various environmental agencies in Florida, and advised students.

Principal Investigator (PI), Community Research Project – Developed protocol and research plan, coordinated community stakeholder meetings, conducted 10 key informant interviews. Managed grant budget, presented findings at conferences and community meetings, and published results in peer reviewed journals.

Multifamily Recycling Pilot, Metropolitan at Lake Eola – Coordinated communications between involved stakeholders. Consolidated findings into summary reports. Gave briefs on progression of the pilot program and coordinated logistics.

Commercial Food Waste Collection, City of Orlando – Assisted program manager with business outreach. Scheduled meetings and site visits. Conducted staff training. Tracked diversion rates.

AWARDS

Research Scholarship – Tampa Garden Club	September 2015
Up and Coming Community Organization Award – Orange County Neighborhood Preservation and Revitalization Division	July 2015
Community Scholars Fellowship – Research Project: Community Gardening in Tampa Bay	Summer 2014
