

Sustainability Project Manager - Contact

Job Code XEM16

NATURE OF WORK:

Performs administrative and professional work related to the development of the City's community sustainability programs. The position develops and manages projects, policy and programs to improve the effectiveness of the City's community sustainability programs, with a specific emphasis on community recycling, community agriculture and community tree planting programs. Additionally, this position will serve as the key advisor to the Sustainability Director on community-facing sustainability programs. Work is performed under the supervision of the Sustainability Director and performance is reviewed on a periodic basis through both formal and informal meetings and reports.

MINIMUM QUALIFICATIONS:

A Bachelor's degree in Environmental Science, Urban Planning, Sustainability, or Business Administration or equivalent and four (4) years experience in the area of sustainability, local food; or equivalent combination of education, training, and experience. A Valid Florida Driver's license is required.

Compensation Grade S10
